 ..

- Advantages: open source, easy installation, web-based, can manage many project at the same time, send-email.
 - Disadvantages: We don't have a host, so only run in local host now.
3. Test plan for Unit test: ongoing (finish before March 23th)

The timeline tracking: because we don't have experience in work with XP team, so at the start stage of the HSM project we can't follow project plan exactly. The project plan will be adjust in first function release by Project Manager.
