

Report 's tracker

The 2nd interaction of HMS Project

Student name: Ngô Minh Anh Thu

Tasks:

1. Write unit test for receptionist:

1. Login
2. Register new patient
3. Lookup patient's information
4. Check available of nurse
 - Environments : Windows 64 bits, SQLite
 - Tools : Junit and Easymock objects.
 - Test approach : Black-box technique
 - Results : see file "Unit Testing-Test case.pdf"
5. Issue with XP methodology: At start of project, some class does not have full information about method behavior, special for input parameter(s) and return type, so unit tests should be changed while coding

2. Role's tracker of XP:

We are more familiar with XP process. But still have some difficult such as:

1. We take a lot of time to understand, install and plugin tools: Git hub, Maven, Hudson.
2. We not found the server to install Hudson so it still run in local host.
3. We still not commit our code to Git usually.
