Report's project manager

The 3rd iteration of HMS project

Student name: Ngo Minh Anh Thu

Time: from March 29th to April 14th

Plan for tasks of this module

- Design test for all functions
- Develop functions relate to nurse role: generic diagnostic, assign doctor
- Refactor : exist code, database wrapper, new code
- Configure GitHub with CloudBees

Schedule the project

- Divide deadline into many slot time commit code to ensure the progress of the module.
- Update Gantt chart
- Release planning for module

Manage team and project

- Control all activities of group in XP programming
- Organize the meeting in group when necessary but cannot each day because the lack of time. In addition, we regularly talk to each other via email or phone when we need to discuss each other.

Support team member

- Some problem about install tools in previous iterations are solved
- After two iterations, all members are familiar with XP so we don't have many problems. Sometimes have problems with push and pull code from GitHub. It makes some members take much time in resolving the problem.
